PROFILE

Computer Science student at Open Universiteit with a multidisciplinary interest in software development, AI and product development. I combine technical problem-solving with creativity and enjoy turning ideas into working digital products. Alongside my studies, I build practical software projects and develop hands-on experience with mobile development, backend services, testing and AI evaluation. Analytical, curious and motivated to understand systems in depth and continuously improve what I build.

PROJECTS

FamilyOS — Mobile & Backend Application

In Progress | Swift · SwiftUI · Firebase

- Developing a family app focused on parent-child collaboration, communication, safety, planning, health, allowance tracking and screen time.
- Building parent/child flows, account and device linking, and role-based access restrictions.
- Implemented functionality including allowance and health tracking, family alerts, check-ins, routines and linked-device status.
- Deployed the Firebase backend; builds and automated tests have completed successfully.
- Continuing development of real-time synchronization, screen-time management, communication and safety functionality.
- Applying privacy- and safety-by-design principles to technical and product decisions.

CURRENT FOCUS

- Software Development · AI/LLM Evaluation · Mobile Development · Backend & Realtime Systems

WORK EXPERIENCE

Administrative Assistant — Childcare Organization Villa Kinderfun

- Processing and managing administrative data, documents, contracts and invoicing.
- Working with digital administrative systems and maintaining accurate records.
- Communicating and coordinating with parents, suppliers and external parties.
- Independently planning, organizing and resolving administrative tasks.

Media Manager — Childcare Organization Villa Kinderfun

- Managing social media channels, online communication and digital information.
- Designing and publishing digital and physical promotional materials.
- Creating content and supporting online visibility and marketing activities.
- Working with digital design and content tools.

EDUCATION & CERTIFICATIONS

Bachelor Informatica — Open Universiteit

September 2025 – Present | In Progress
Programming · software development · algorithms · databases · information systems · software engineering

Bit Academy — Nexed Orientation | In

Progress
Development · AI & Data · Cybersecurity · Robotics · Git

NHA — App Development & Programming

Completed: May 2025
Final grade: 10/10
Apps, programming and software development.

Dutch State Exam NT2 — Programme II

Completed: April 2025
Dutch — Fluent | qualification for higher education and the professional workplace

IELTS Academic B2

Completed: July 2025
B2 | IELTS Academic
The overall IELTS band score 5.5

Codam Coding College — Piscine

Intensive programming programme · Amsterdam
C programming · Algorithms · Memory management · Problem-solving · Git-push · Slack

TECHNICAL SKILLS

- Technical Foundation: Python · Java · C · C++ · JavaScript · Swift · SQL · HTML · CSS · SwiftUI · Angular · iOS development
- Backend & Data: Firebase · Firebase backend functions · real-time synchronization · SQL
- Development Practices: Git · GitHub · debugging · build validation · automated testing · simulator testing · version control
- Tools & Platforms: VS Code · Cursor · Xcode · Windsurf · JetBrains IDEs · Docker (learning)
- Creative Technology: Canva · Framer · Elementor · Affinity Designer · Procreate · Blender · SketchUp · Live Home 3D · Logic Pro · FL Studio
- Professional: analytical problem-solving · planning · independent work · communication · documentation

INTERESTS

AI & Generative AI
Robotics & automation
Product development · UX/UI
Hardware & electronics
3D design & creative technology
Music production & audio technology
Quantum mechanics & emerging technologies

CURRENTLY LEARNING

- AI & Software: LLM evaluation · prompt quality · REST APIs · HTTP/JSON · FastAPI · PostgreSQL · RAG · AI Agents/tool calling
- Engineering & Cloud: Docker · Azure fundamentals · CI/CD · GitHub Actions · testing · monitoring · application security
- Computer Science: algorithms · data structures · Big-O · software architecture
